Introduction

ICAADA, a subsidiary of Mental Health America of Indiana, provides credentialing for behavioral health professionals. ICAADA provides behavioral health professionals with credentials, membership, and advocacy that validate the professionals' competencies to provide person-focused, evidence-based behavioral health services.

ICAADA was first formed In September 1973 by a group of dedicated and forward-looking substance use professionals. ICAADA started as an association of substance use professionals and people interested in the field. It was quickly decided there needed to be a process designed to establish a credential that would certify a person's competency relates to substance use treatment.

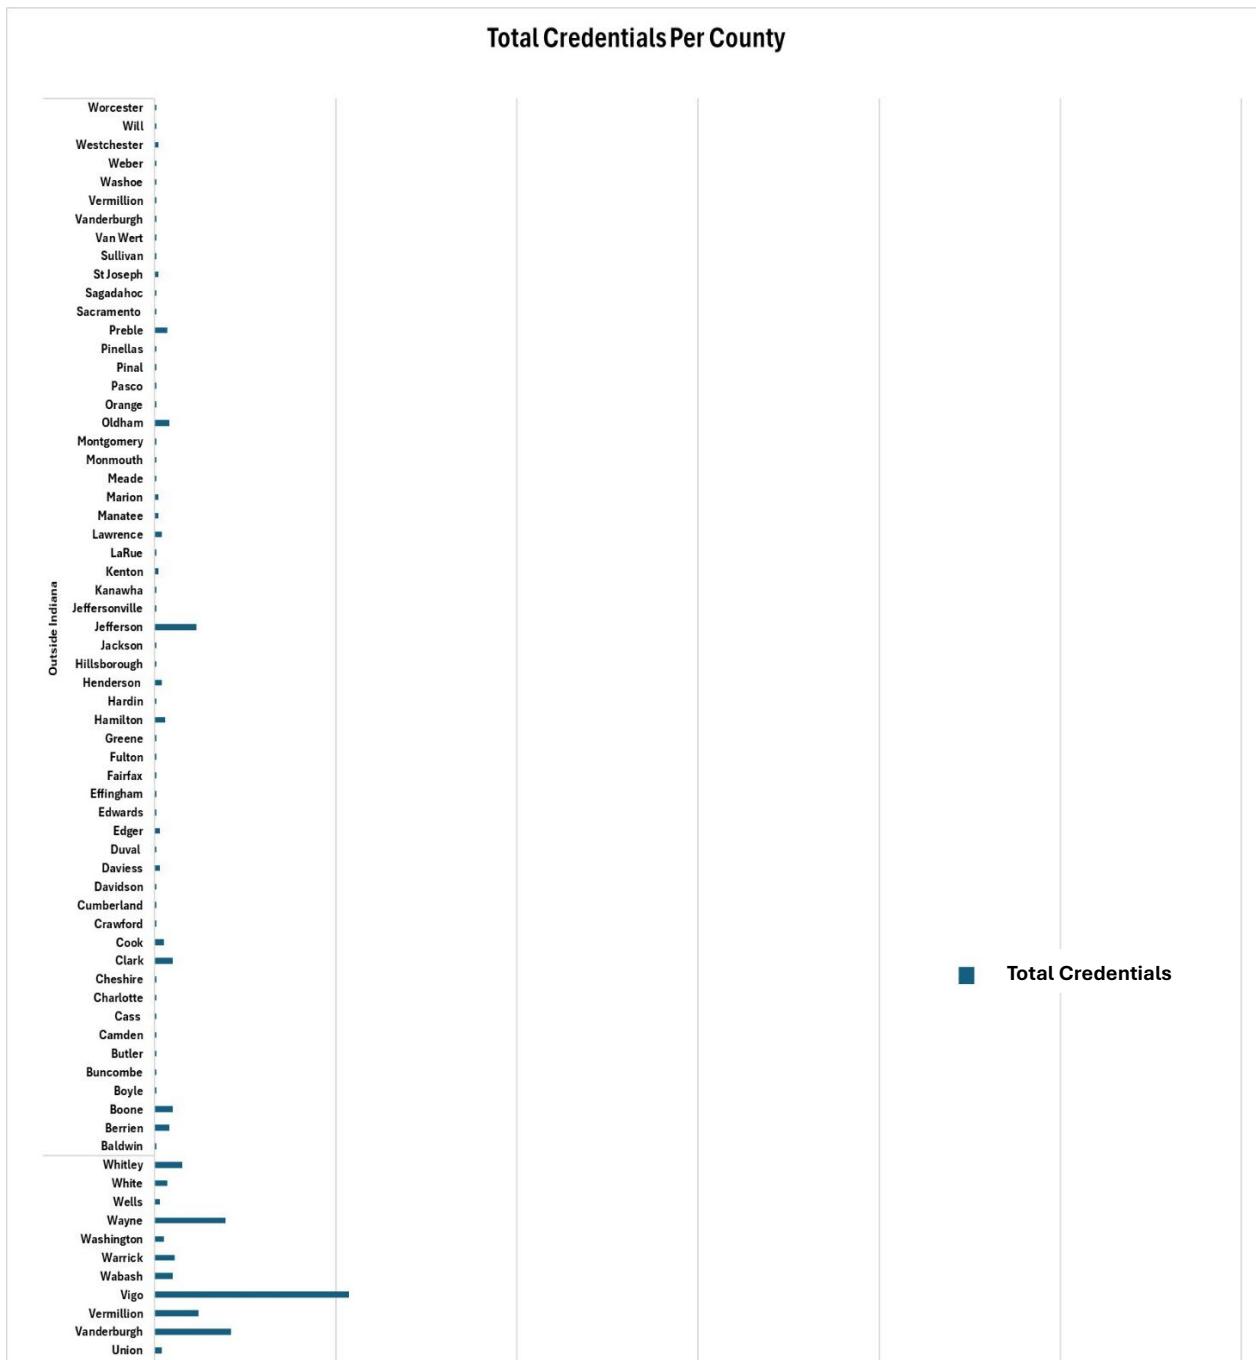

ICAADA is Indiana's longest tenured substance use certification organization. In 1976, with the cooperation of what was then the Department of Mental Health, Division of Addictions Services, ICAADA began the process of certification with the first credential being the Certified Alcohol Counselor (CAC). In 1977, a second credential, the Certified Drug Counselor (CDC), was established. In 1978, ICAADA established the Certified Alcohol & Drug Abuse Counselor (CADAC) credential (now known as the Certified Alcohol and Drug Addiction Consultant).

In 1979, a meeting was held in Merrillville, Indiana between representatives of ICAADA and the credentialing boards of Michigan and Wisconsin. A reciprocity agreement was reached which became the foundation of what is now the International Certification & Reciprocity Consortium (IC&RC). IC&RC was incorporated in 1981 to become the first international substance use certification organization. ICAADA, along with the boards of Michigan and Wisconsin, laid the groundwork for what is now an internationally recognized organization that has 73-member credentialing boards worldwide, representing over 35,000 certified addiction professionals from 41 states, Canada, Germany, Sweden, Puerto Rico, as a well as several branches of the armed forces.

For fifty years, ICAADA has been committed to public protection through the establishment of quality, competency-based certification programs for professionals engaged in the prevention, treatment and recovery of behavioral health concerns. ICAADA continues to be an industry leader on the state, national and international levels related to behavioral health certification.

Credential Overview

ICAADA credentials support beginning, continuing, or advancing a career in behavioral health. ICAADA credentials are highly recognized in Indiana and many offer reciprocity in other states that have an IC & RC affiliate board. ICAADA is an approved credentialing body by the Indiana Division of Mental Health and Addiction (IDMHA) and a founding member of the International Credentialing and Reciprocity Consortium (IC&RC).

Total Credentials Per County graph continued onto next page

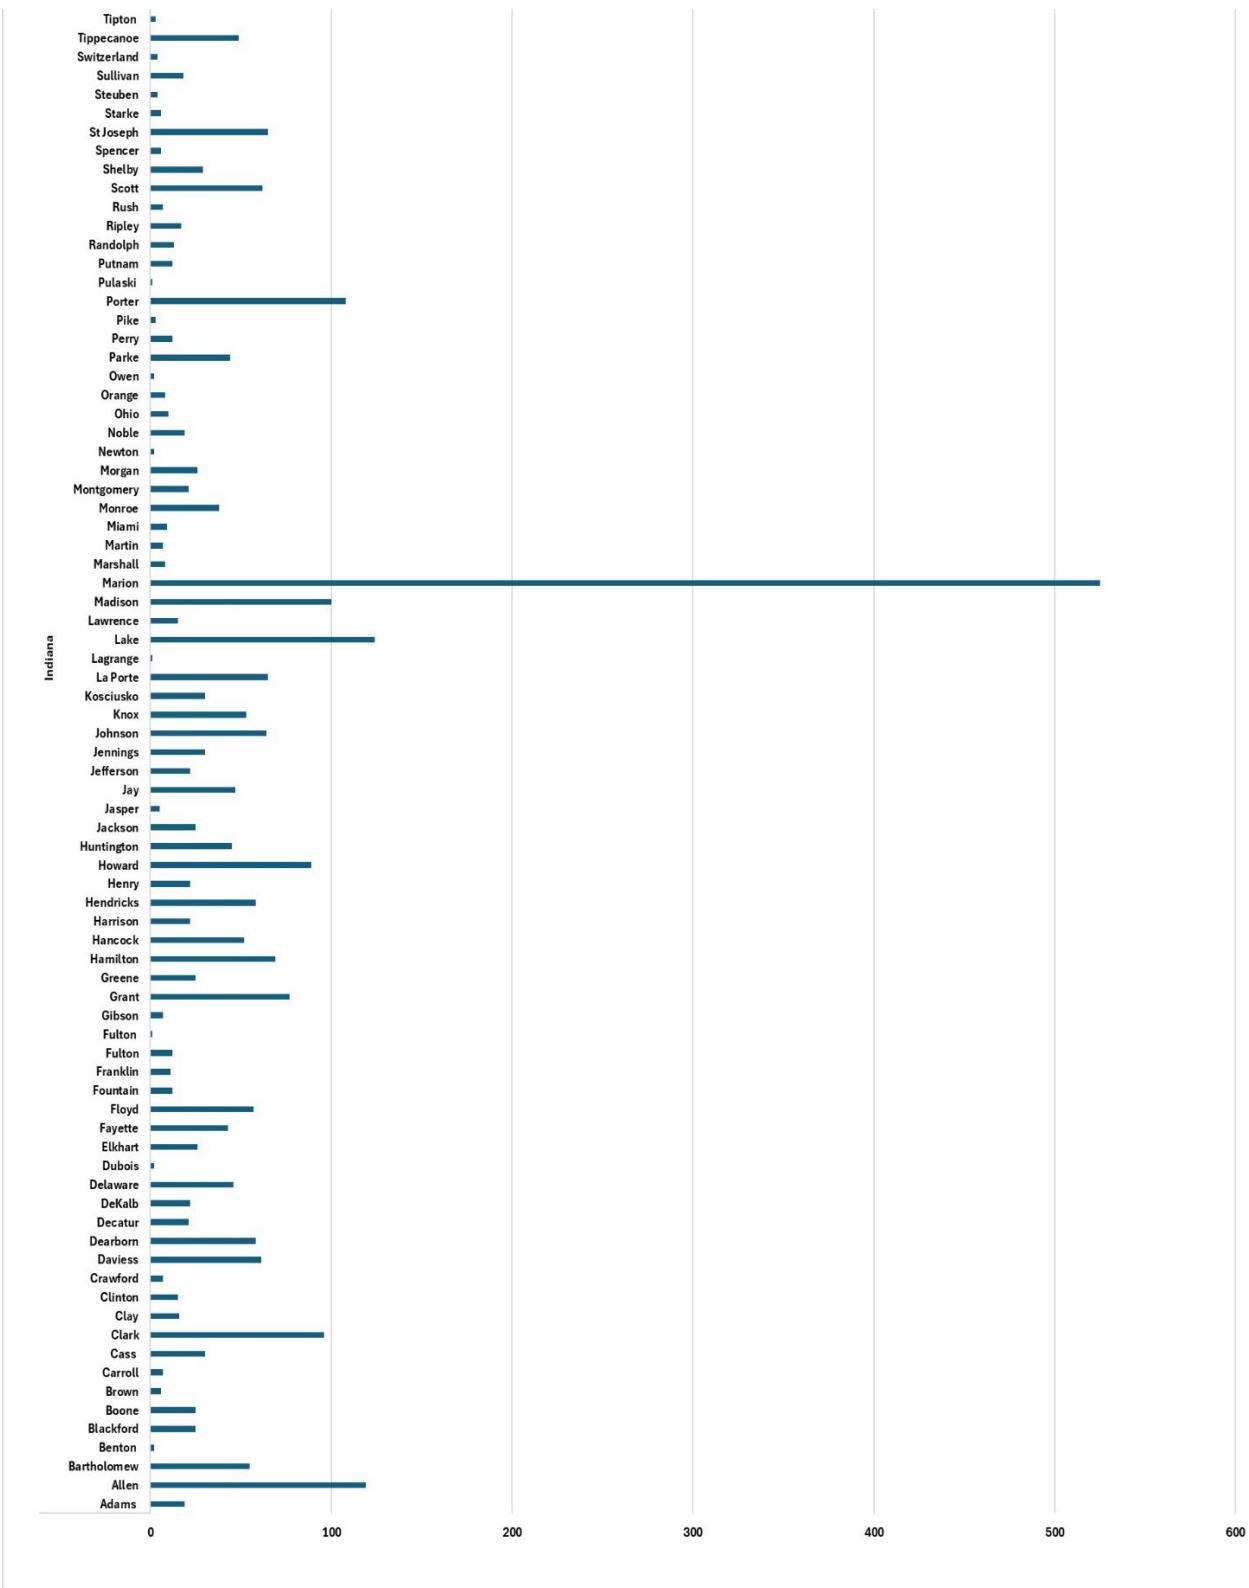

Figure 1 shows the total count of ICAADA certification credentials by county within Indiana and outside. There is a total of 3,387 ICAADA credentials, with 95% being in Indiana and 5% outside of Indiana. The 5% of credentials are in the following states: Alabama, Arizona, California, Florida, Georgia, Illinois, Kentucky, Maine, Massachusetts, Michigan, Mississippi, Missouri, Nevada, New Hampshire, New Jersey, New York, North Carolina, Ohio, Tennessee, Texas, Utah, Virginia, and West Virginia.

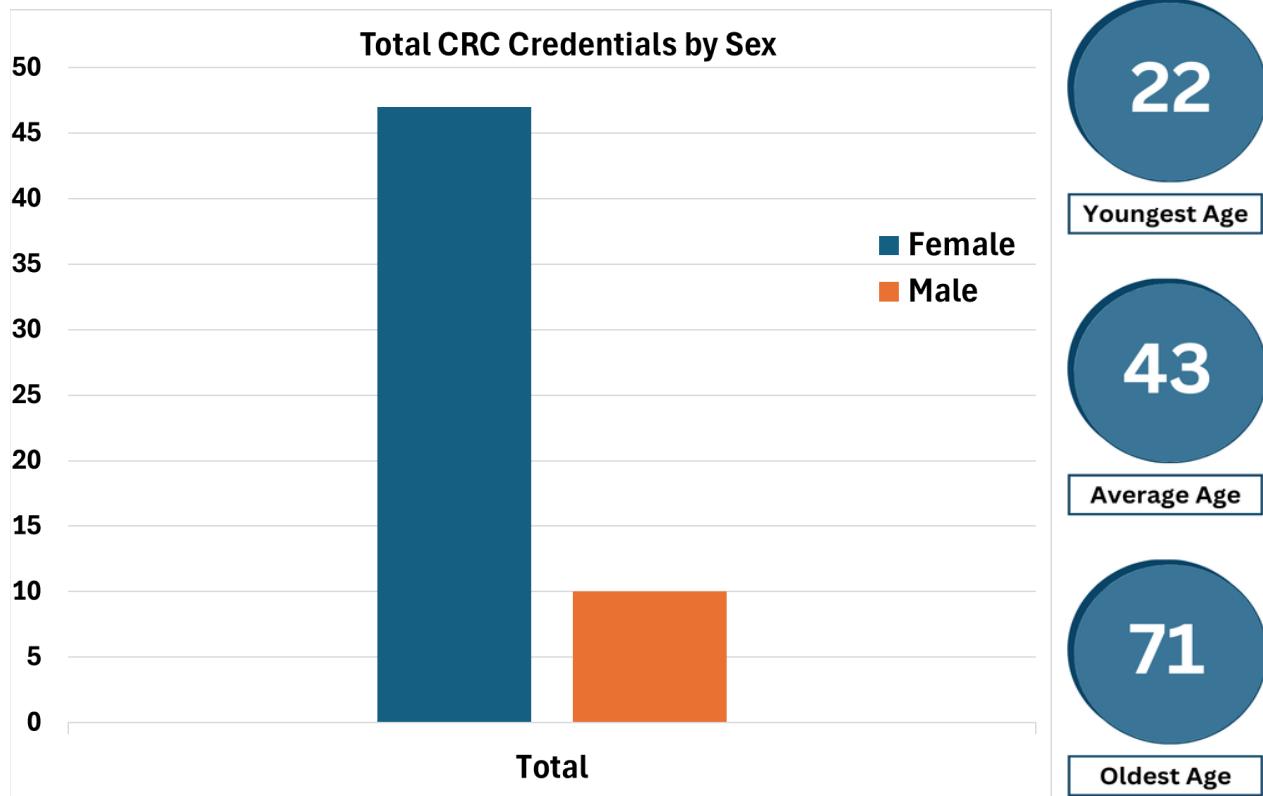

Figure 71 shows the total of CRC credentials based on Age and Sex.

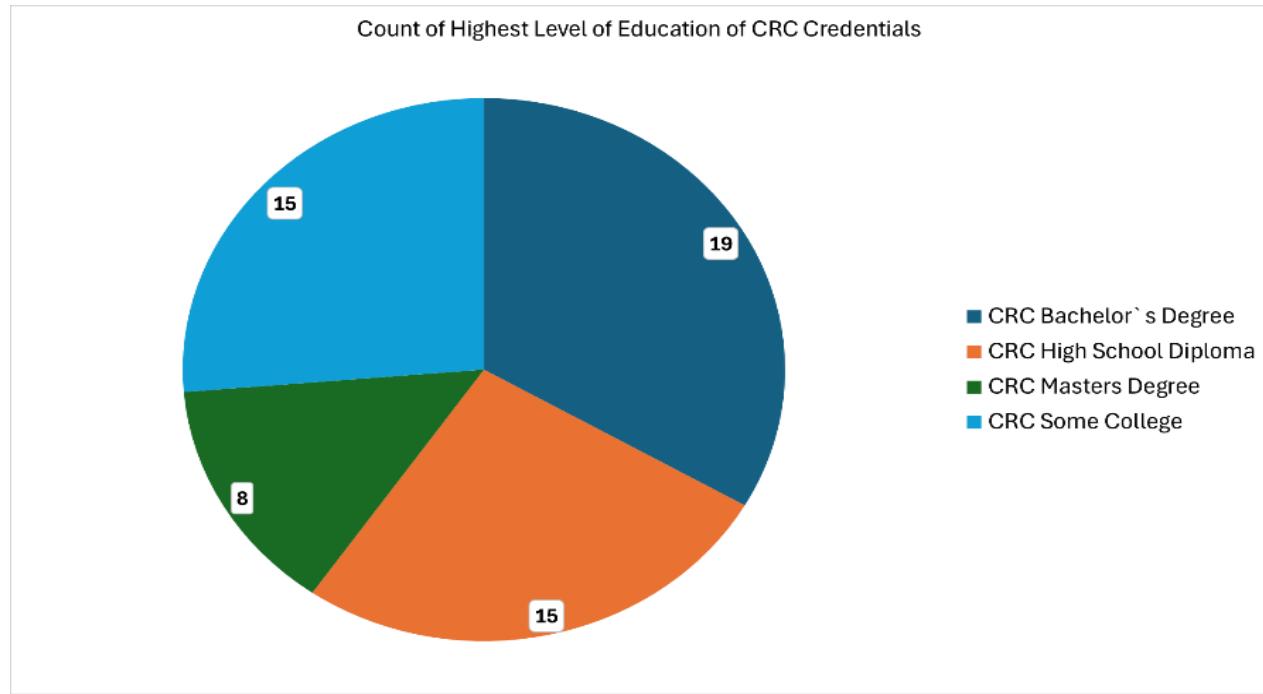

Figure 72 shows the count per education type for CRC credentials.

Certified Recovery Coach II (CRC II) is an experienced level credential for family members, allies, loved ones or others who do not have personal, lived experience of recovery from substance use, mental health or co-occurring disorders. This credential is for those who wish to provide recovery support to those seeking/in recovery from substance use and/or mental health concerns.**The CRC II was introduced in late 2024 as a new credential and at the time of these reports, had not been obtained by anyone so there is no data to report at this time.**

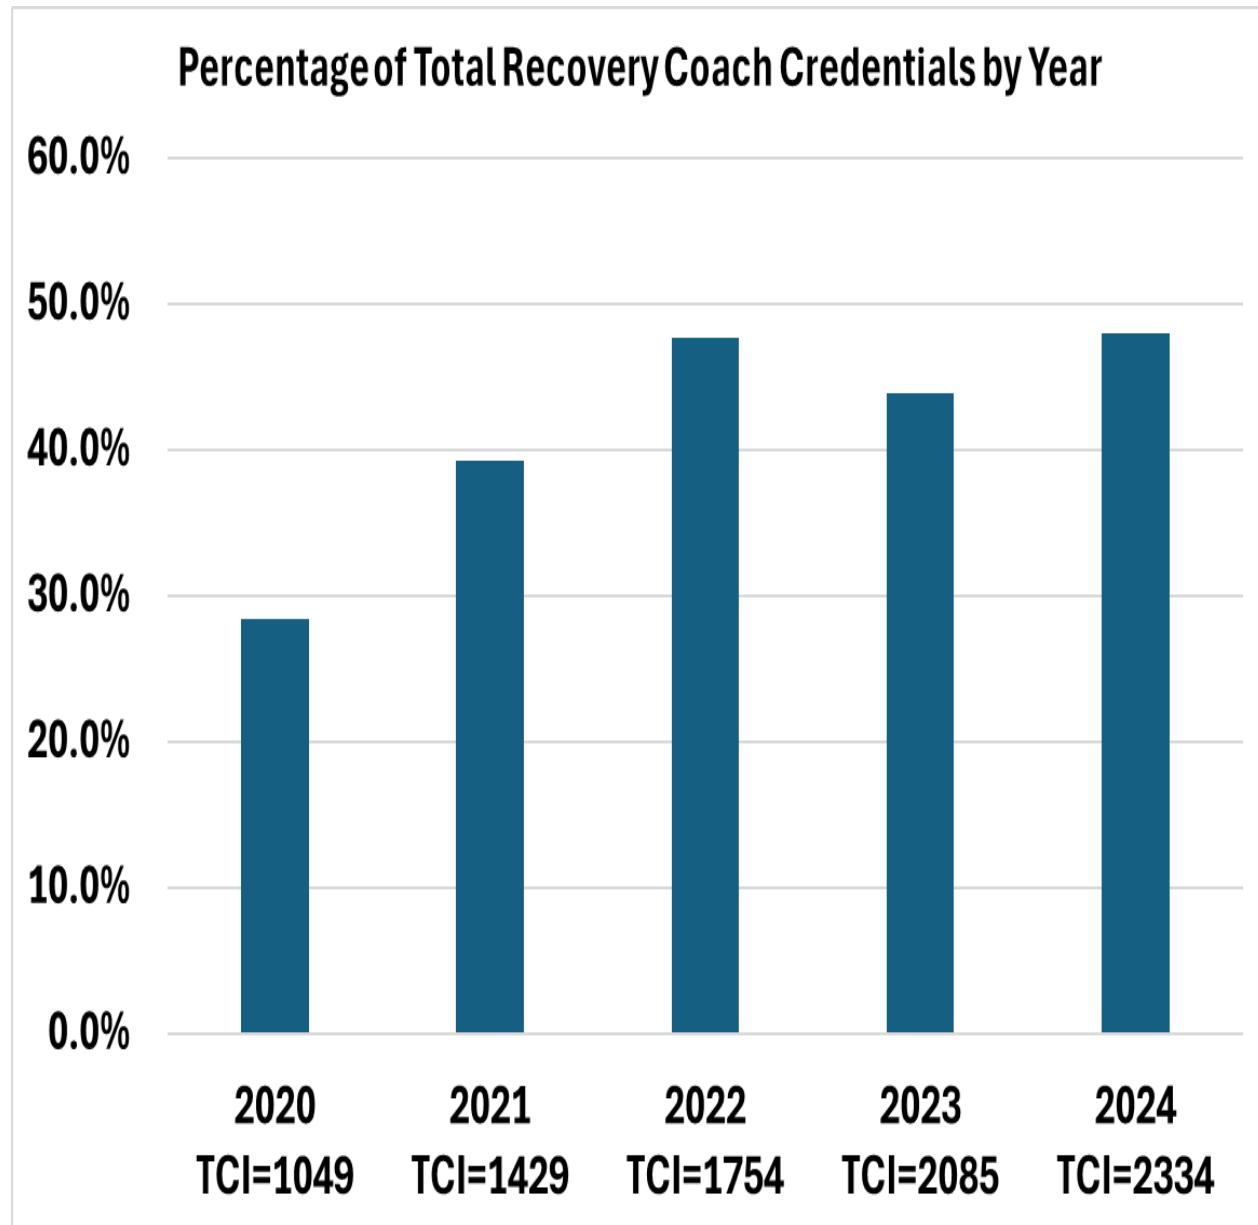

Figure 73 is the percentage of total Recovery Coach (CPRC-A, CPRC, and CRC) credentials (blue bars) compared to the total credentials issued (TCI=) for that year. It is important to note that the CRC did not exist in 2020.

Supervision Credentials

Certified Clinical Supervisor (CCS) is a clinical credential recognized by the International Credentialing and Reciprocity Consortium (IC&RC) and IC&RC affiliated states and countries that offer the IC&RC CCJP credential

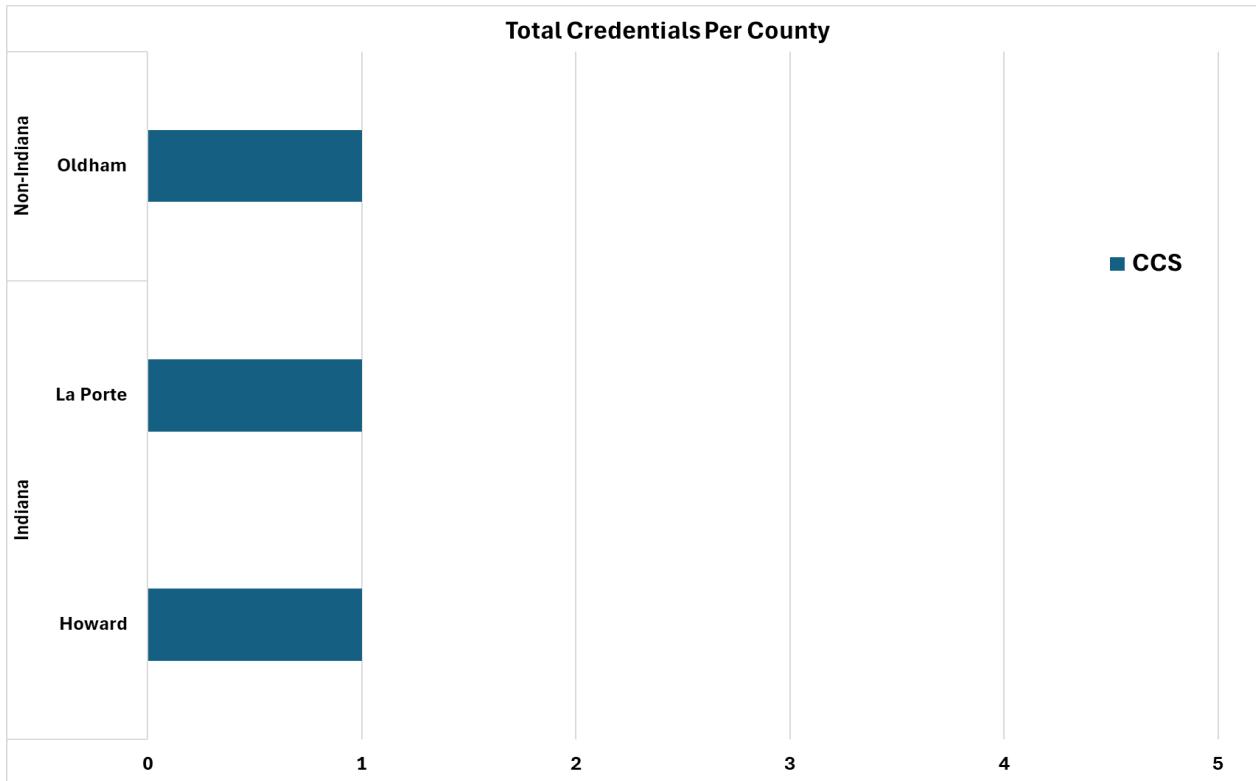

Figure 74 shows the count of CCS credentials by Indiana County and outside. Of the total 3 CCS credentials, 67% are in Indiana and the remaining 33% are in the following state: Kentucky.

Indiana County	Total Credentials
Howard	1
La Porte	1

Figure 75 shows the county and number breakdown as seen in figure 100. Indiana has 92 counties and of them, there is an ICAADA CCS credential in 2% of them.

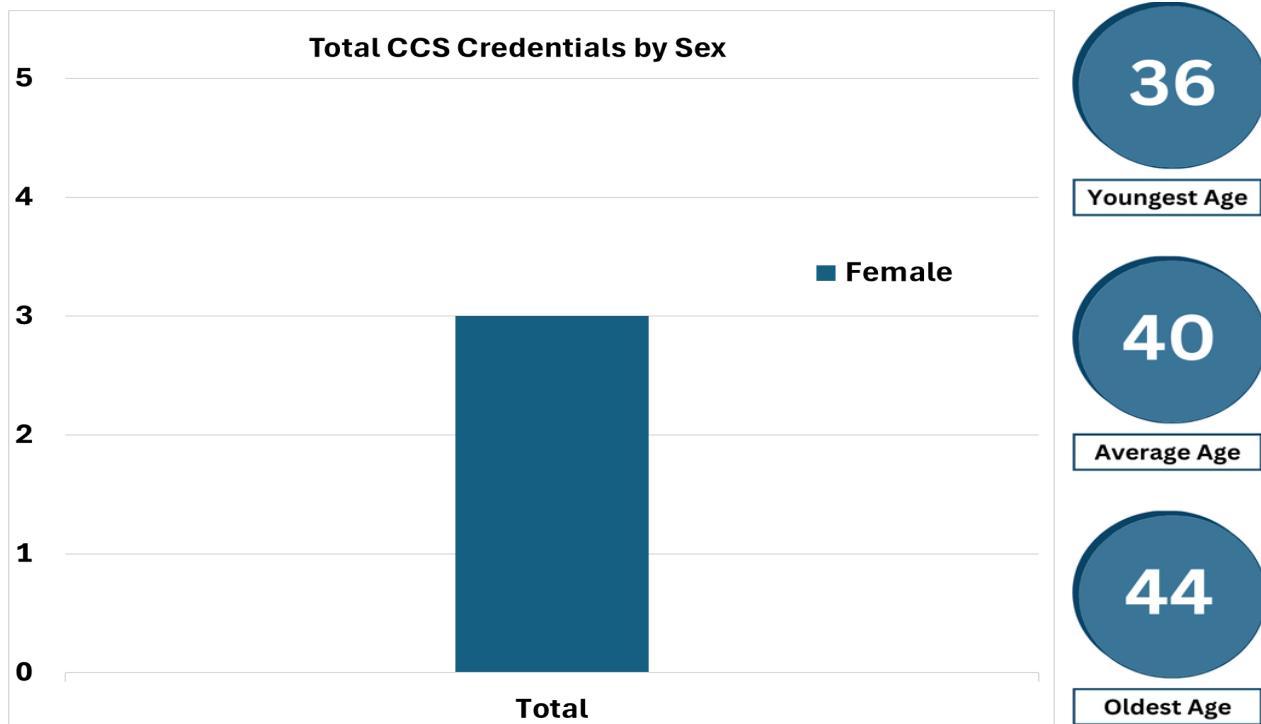

Figure 76 shows the total of CCS credentials based on Age and Sex.

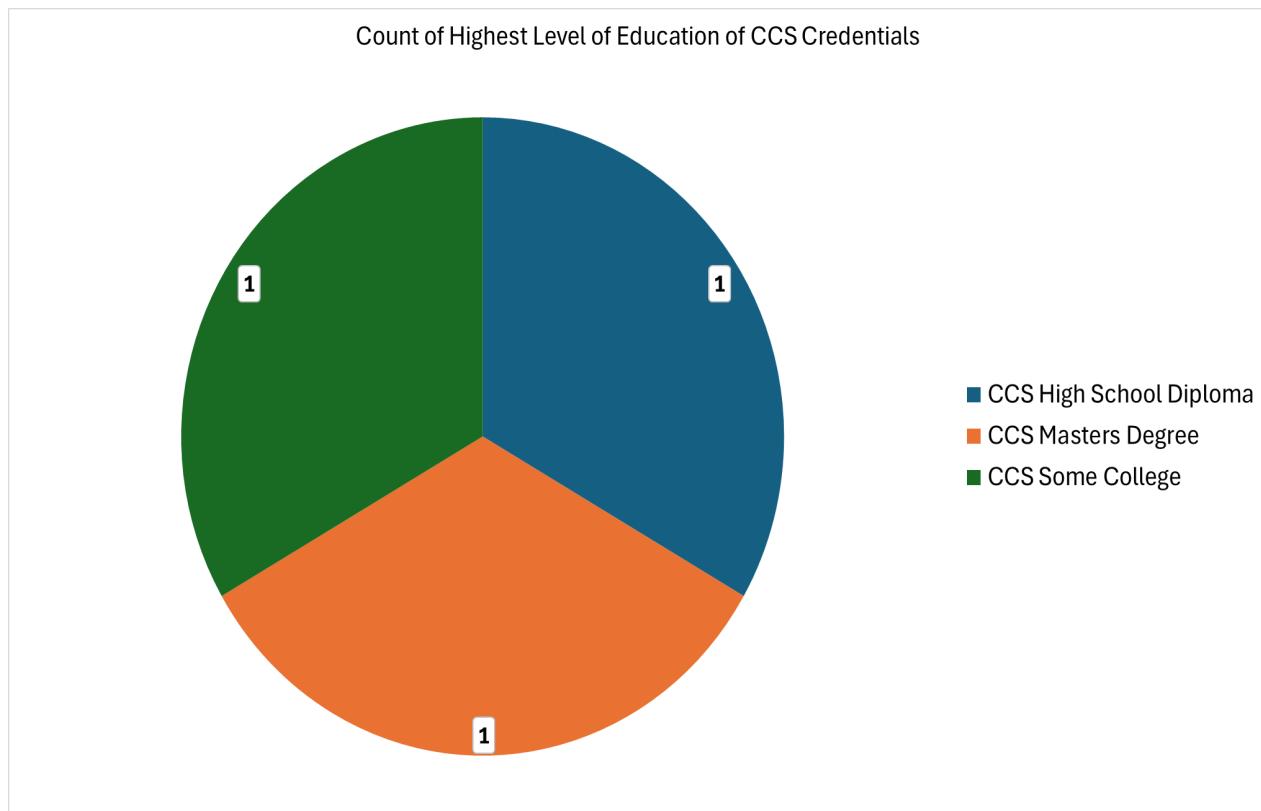

Figure 77 shows the count per education type for CCS credentials.

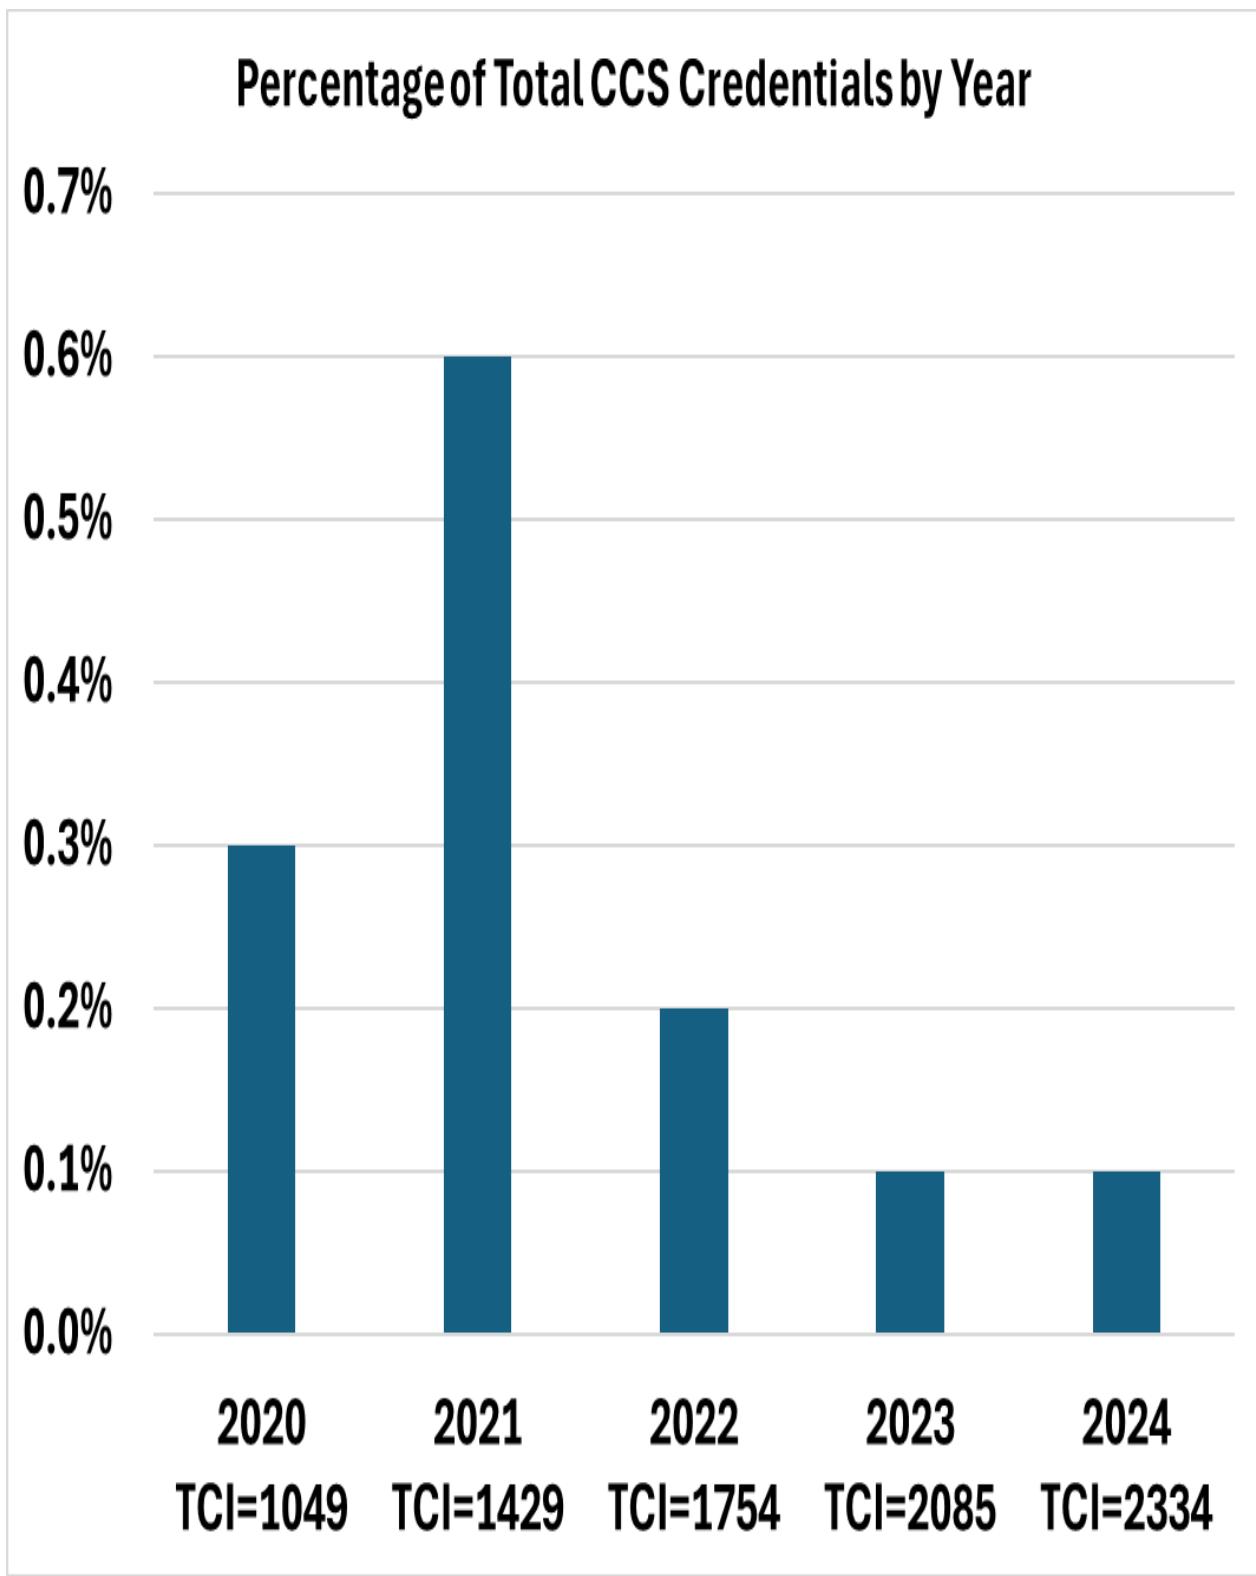

Figure 78 is the percentage of total CCS credentials (blue bars) compared to the total credentials issued (TCI=) for that year.

Certified Supervisor of Peer Recovery – Clinical (CSPR-CL) is a credential for treatment/clinical professionals who wish to show their competencies related to providing effective and ethical recovery support supervision.

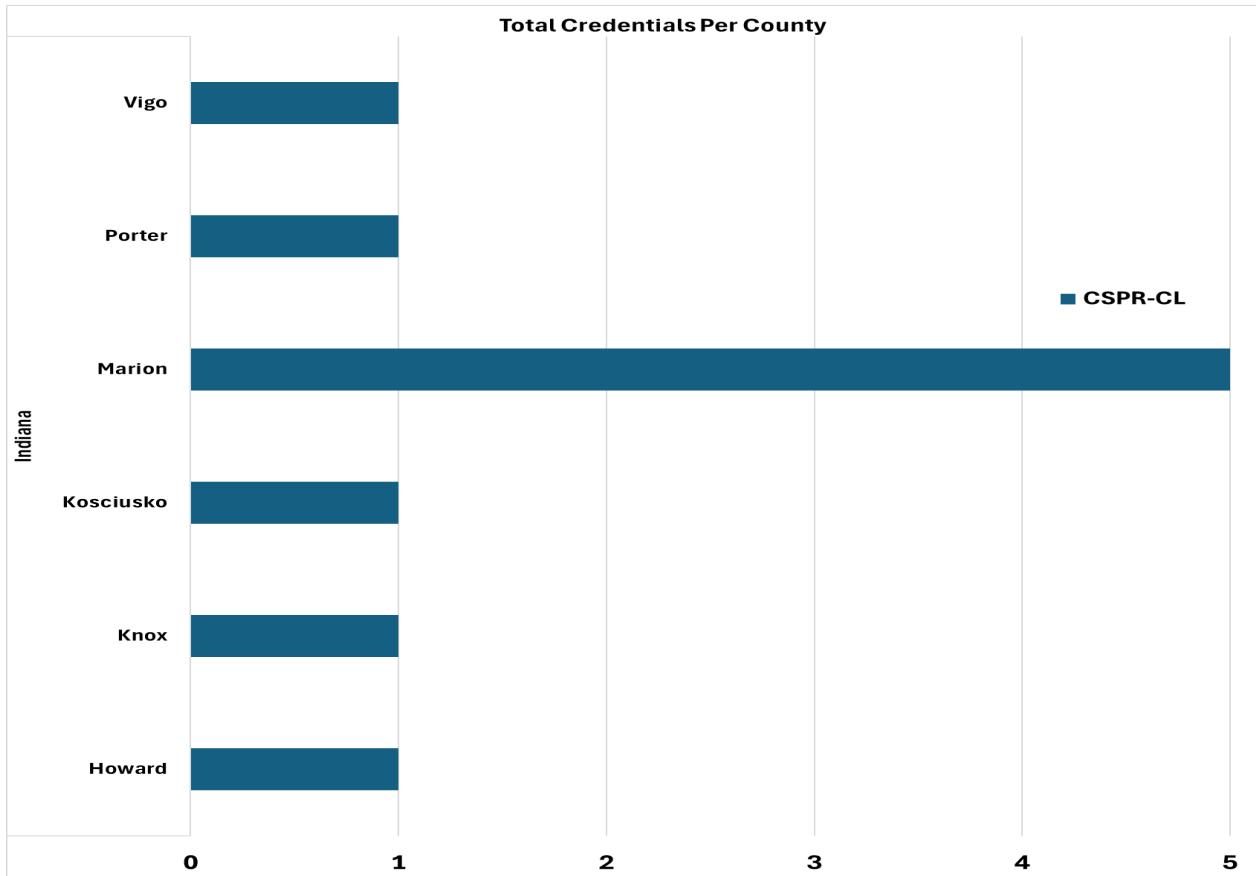

Figure 79 shows the count of CSPR-CL credentials per Indiana county. Making a total of 10 CSPR-CL credentials across Indiana.

Summary

ICAADA remains committed to enhancing the behavioral health profession by ensuring public protection through a competency-based credentialing framework. This report presents pertinent data that underscores ICAADA's role as a valuable partner within the community, facilitating access to qualified professionals who can effectively address behavioral health needs. Furthermore, the continuous expansion of the ICAADA credentialed workforce exemplifies this commitment to quality and support in the field.

Specific efforts to highlight in 2024 include:

- Partnership with the Indianapolis Mayors Office of Public Health and Safety to increase access to certified recovery coaches in their communities.
- The Department of Workforce Development (DWD) recognized the Certified Recovery Coach (CRC) credential as an 'Industry Promoted Certification'.
- Increased involvement with the International Certification and Reciprocity Consortium (IC&RC) for national credentialing and advocacy efforts.
- ICAADA credential code of ethics used as suggested templates for IC&RC affiliate boards
- Expansion of Department of Labor Peer Recovery Coach Registered Apprenticeship sites and apprenticeship participants.
- Expansion of field placement opportunities for peer recovery coaches.
- Expanded exploration of collegiate partnerships
- Indianapolis area high school career day presentation on importance of credentialing in behavioral health
- Increased partnership with service provider Adult & Child
- Strengthening ethical oversight through new Ethics policy and procedure and Ethics disciplinary guidelines; including having public access to information
